Professional Profile

Business Information Systems graduate with strong practical experience in web development. I have built and deployed real-world web applications and websites through an internship and freelance projects. My goal is to pursue further studies and professional growth in web development and software engineering within an international and innovative environment.

Education

Degree in Business Information Systems   Tunisia
ESB – School of Business
Relevant coursework: Web Development, Information Systems, Databases, Software Engineering

Professional Experience

Web Development Intern – KC Security   Tunisia
Security Company
— During my internship at KC Security i designed and developed a complete web application tailored to the company's needs. I was involved in the full development lifecycle, including requirements analysis, development, and testing. Through this project, I contributed to improving the company's digital presence and optimizing internal processes using web-based solutions.

Projects & Freelance Work

Koozina.tn – Business Website (Freelance, Deployed)

- Designed and developed a professional business website for a Tunisian kitchen worktop company.
- Fully deployed the website with a live domain and production environment.
- Implemented a responsive and user-friendly interface to enhance online visibility and client engagement, with an admin interface.

Genmar – Merchandise Traceability Web Application (Freelance)

- Designed and developed a web application for merchandise traceability and stock management.
- Implemented QR code scanning to track products, expiration dates, and stock levels.
- Enabled inventory transfers between different zones and locations.
- Improved operational efficiency through real-time tracking and data management.
